## Peak Performance Nutrients

This month we focus on Peak Performance Nutrients products.

Peak Performance Nutrients, is the manufacturer of the number one sugar and filler free equine vitamins and supplements in US for all classes of horses including dressage, hunter jumpers, standardbred, thoroughbred, quarterhorse, eventing, and endurance.

Peak Performance Nutrients carries a complete line of equine vitamins and supplements for joints, calming, tying up, performance, pre-race, bleeding, antioxidants, muscles, energy and more for all types of horses.

Peak Performance Nutrients supplements are manufactured without using any sugars or fillers and are probably the most concentrated feed supplements in the US market today. Sugars and high carbohydrate diets can lead to obesity and glucose intolerance in horses as well as Metabolic syndrome, Cushing's Disease, Laminitis, Osteochondritis (OCD) and Ulcers. Furthermore, fillers can interfere with absorption because of the volume of product competes with the vitamins and minerals for absorption.

Please find below the 10 Best- sellers products from Peak Performance Nutrients:
