

Tie Free® TMC™

Total muscle care for performance horses

Sodium Bicarbonate Free

- Supports replenishment of glycogen stores
- Supports muscle recovery
- Supports muscles prone to tying up
- May help horse maintain his top speed longer

Tie Free TMC contains nutrients important to heart and skeletal muscle function including Amino Acids, and Calcium. Additionally, Tie Free TMC provides a special protein matrix which includes important cofactors Beta-Lactoglobulin, Alpha-Lactalbumin, and Glycomacropeptide. This special protein matrix, exclusive to Tie Free TMC, supports replenishment of glycogen stores during intense activity. Glycogen provides energy to the muscles and accelerates recovery after intense exercise. Also, the components of the Tie Free TMC protein matrix support the muscles in synthesizing amino acids needed for muscle recovery and growth.

Directions for Use:

- Feed 1 scoop (Approx. 14 grams) twice daily with feed or as directed by your veterinarian or equine nutritionist.
