

Advance H.A.™

Effective Lower Dose Glucosamine for IR Horses.

Advance H.A. provides an effective half dose of Glucosamine combined with glucose neutral Hyaluronic Acid, Ester-C, Boswellia and Chelated Minerals to make a comprehensive joint support formula for glucose intolerant horses. Glucosamine plays a very important role in overall joint health and is possibly the most effective part of any joint supplement and therefore too important to be eliminated entirely. Advance HA does not contain any added sugar such as dextrose or fillers such as alfalfa.

Directions for Use:

- Administer 9 grams (1 scoop) once per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Aller Cease™

Allergies? Coughing?

Aller Cease provides respiratory support for horses with seasonal allergies as well as horses stabled in areas with dry, dusty air and elevated levels of pollen or other airborne allergens. Aller Cease contains a concentrated blend of Citrus Bioflavonoids, Hesperidin, Rutin, Quercetin, and Mullein Leaf.

This palatable and concentrated formula provides support for:

- Wheezing and bronchospasm
- Stable cough
- Chronic nasal discharge
- Mild to early heaves

Support your horse's respiratory system effectively today with Aller Cease.

Directions for Use:

- Administer 34 grams (1 scoop) once per horse per day with feed or as directed by your veterinarian or equine

nutritionist.

B.C.A.A. Complex™

Endurance, Strength and Recovery

- Supports muscle growth
- May help horse maintain his top speed longer
- Supports recovery and reduced muscle breakdown
- Supports muscle preservation during intense activity

B.C.A.A. Complex is a unique combination of the muscle supporting amino acids L-Valine, L-Leucine and L-Isoleucine, collectively called Branched Chain Amino Acids. B.C.A.A. Complex can be fed daily for attitude, muscularity and recovery. Additionally, B.C.A.A. Complex can be administered as a three day highly effective pre-event without the need for event day administration. B.C.A.A. Complex supports a more alert and energetic horse with the ability to maintain his top speed longer. Supplemented Branched Chains work by feeding exercising muscles into growth and repair instead of tired muscles feeding off of existing protein producing a catabolic (muscle wasting) state.

Directions for Use:

- Daily Use: Administer 10 grams (1 scoop) twice daily with feed or as directed by your veterinarian or equine

nutritionist.

Biotin Complete®

Comprehensive Formula for Dried, Cracked Hooves

Biotin is considered to be one of the most important vitamins for hoof health and feeding supplemental biotin above the amounts normally found in feed is one way to improve hoof health. However, there is more to healthy hooves than just biotin. In addition to Lysine, Methionine and Zinc, Biotin Complete also contains concentrated amounts of B Vitamins, amino acids and trace minerals to offer the most comprehensive and concentrated biotin formula ever produced. Biotin Complete does not contain sugars such as Dextrose or Maltodextrin to water down the formula and make it less effective. Since it takes time for new hooves to grow, it may take 10 to 12 months to completely replace the hoof with a new, stronger wall, with healthy growth appearing at the top of the hoof in as little as 2 to 3 weeks.

Directions for Use:

- Administer 20 grams (2 scoops) once per day with feed or as directed by your veterinarian or equine nutritionist.

Bleeder Event Pak™

Powerful, All-Inclusive Pre-Event Formula for Bleeders

- High dose capillary supporting nutrients including Rutin and Hesperidin
- Herbal support including Yunnan Paiyao
- Added Potassium for Lasix horses.

Directions for Use:

- Administer 1 Pak (350 g) per horse the day before the event or as directed by your veterinarian or equine nutritionist

Blitz!® Pak

More Gas in the Tank - Blitz! Pak is the number one vitamin/mineral pre-event in an easy to feed pak

Blitz!® Pak is a product for those serious about pre-event nutrient balance. Blitz! Pak is more than double the strength of Blitz! Paste with the addition of the antioxidants Lipoic Acid and L-Carnosine to fight cellular damage, muscle supporting beta-Hydroxy beta-Methylbutyrate (HMB), plus a proprietary blend of DGL Licorice, Fenugreek, Ginger, Turmeric and Yucca designed to support muscular stamina and the nervous system.

Directions for Use:

- Administer 1 Pak the day before event with feed.

Blitz!® Paste Comfort Blend

Race Harder, Stronger, Longer with New Formula Blitz!, Now with Herbs to Support Aches and Discomfort

Blitz!® Paste is the most comprehensive oral vitamin/mineral jug with herbs for pain & discomfort caused by training and exercise.

- Helps keep horses fresh
- Helps horse to finish the event stronger
- Supports recovery
- Replenishes nutrients lost during intense activity
- May help horses maintain their top speed longer
- New formula now provides the Comfort Blend of Boswellia, Tumeric, Ginger and Fenugreek for aches and discomfort

Blitz! Paste incorporates the latest research and field trials into the ultimate pre-event vitamin/mineral jug for highly trained performance horses. More than an electrolyte, more than an amino acid paste, more than a vitamin/mineral and more than a digestive support product, Blitz! Paste combines over 45 food grade ingredients in the proper proportion and dose for the fastest absorbing, most concentrated product of its kind. Every performance horse could use a little more assurance before the big event...Blitz! Paste is here to help.

Blitz! Paste is also available in Original Formula!

Directions for Use:

- Training: Administer 1/2 tube (Approx. 40 cc) 1 hour before and after exercise.
- Performance: Administer 1 tube (Approx. 80 cc) 3-4 hours before exercise.
- Endurance Exercise: Administer 1/3 tube (Approx. 26 cc) every 2-3 hours of activity.

Blitz!® Paste Original Formula

Strongest Oral Vitamin/Mineral Jug per 80 cc Tube

- Helps keep horses fresh
- Helps horse to finish the event stronger
- Supports recovery
- Replenishes nutrients lost during intense activity
- May help horses maintain their top speed longer

Blitz! Paste incorporates the latest research and field trials into the ultimate pre-event vitamin/mineral jug for highly trained performance horses. More than an electrolyte, more than an amino acid paste, more than a vitamin/mineral and more than a digestive support product, Blitz! Paste combines over 35 food grade ingredients in the proper proportion and dose for the fastest absorbing, most concentrated product of its kind. Every performance horse could use a little more assurance before the big event...Blitz! Paste is here to help.

Directions for Use:

- Training: Administer 1/2 tube (Approx. 40 cc) 1 hour before and after exercise.
- Performance: Administer 1 tube (Approx. 80 cc) 3-4 hours before exercise.
- Endurance Exercise: Administer 1/3 tube (Approx. 26 cc) every 2-3 hours of activity.

Calcium Complex™

For High Grain Diets, Heavy Training or Lactating Mares

Calcium Complex is designed for horses on high grain diets or for use in situations where a high level of calcium may be required, such as heavy training or lactating mares. Calcium Complex, designed to balance feed rations, contains both Calcium Carbonate and Calcium Citrate for superior absorption. Additionally, Calcium Complex also contains necessary amounts of Vitamin A for bone tissue support and Vitamin D to help ensure proper calcium absorption.

Directions for Use:

- Feed 1 scoop (10 grams) once per day per horse with feed.

Creatine Power® 5000

Explosive Energy - Pure Creatine Monohydrate

- Superior absorption
- Muscle power
- Recovery support
- Energy support

Creatine Power 5,000 contains pure Creatine Monohydrate without sugars or fillers. Designed specifically for the rigors of heavy training, Creatine may help delay fatigue in the muscles which allows for a longer, more intense workout. Keep your horse well hydrated while feeding Creatine Power 5,000.

Directions for Use:

- Loading Phase: Administer 25 grams (5 scoops) three times per day for seven days with feed.
- Maintenance: Administer 25 grams (5 scoops) twice per horse per day with feed.

Creatine Power® EE

Explosive Energy & Muscle Support - Pure Creatine Ethyl Ester

Creatine Power EE contains pure Creatine Ethyl-Ester without sugars or fillers. Creatine Ethyl-Ester is similar to Creatine Monohydrate except that it has an attached ester - an organic compound formed by a reaction of carboxylic acid and alcohols. Creatine Ethyl-Ester is an extremely soluble form of Creatine that may result in superior absorption, bio-availability, and molecular stability. With direct absorption, Creatine EE may not have the side effects of Creatine Monohydrate such as possible cramping and dehydration.

Directions for Use:

- Loading Phase: Administer 20 grams (1 scoop) three times per day for seven days with feed.
- Maintenance: Administer 20 grams (1 scoop) twice per horse per day with feed

DMG 28000™

The most concentrated DMG product available.

- Over 28,000 mg of DMG per ounce
- 19 times more concentrated than DMG 1,500
- 9 times more concentrated than DMG 3,000

DMG, or N,N-Dimethylglycine, is a nutrient common to many grains and meat. DMG has been found to support the immune system and oxygen transport to into the cells. DMG 28,000™ is pure DMG without dextrose or other sugars and fillers.

Directions for Use:

- Administer 5 grams (1 scoop) once per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Ester-C®

Absorbable, Stomach Friendly, Vitamin C for Immune System Support

Ester-C® is a natural, buffered form of Vitamin C designed for maximum absorption without stomach upset. Since it has a neutral pH, Ester-C will not contribute to the formation of stomach erosions like the common form of Vitamin C, Ascorbic Acid, can.

Ester-C is a registered trademark of the Ester-C Company.

Directions for Use:

- Feed 1 scoop (5 grams) per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Ex Stress™

Stressed Horse? Try the Ultimate Calmative, Now Available in Pellet Form for Picky Eaters

No Valerian, No Tryptophan, and No Sugars

Calm Down and Finish Strong with Ex Stress, The Ultimate B Complex & Magnesium Calmative.

- Focused and productive training
- Stress-free travel to and from the event
- Addresses nutritional deficiencies that cause anxiety
- Herb free formula won't cause drowsiness
- More than just Thiamine - includes 5 necessary B-Vitamins for behavioral support
- Available as a daily feed powder or as a pre-event / pre-travel paste

Ex Stress is an all natural, herb free formula to help your horse handle the stress of travel and competition. Don't let your horse's pre-event jitters cause him to wash out at the end of the event, feed Ex Stress. Ex Stress is available as a daily, economical powder and pellet, or an easy to feed event day paste. Ex Stress succeeds where other products have failed. When you need an effective calmative for your horse, try Ex Stress first.

Out of 30 calming products tested, Ex Stress was picked as the overall best calmative by the Horse Journal.

"Ex Stress is the right mix when you need to take the edge off in a stressful situation." - Horse Journal

Directions for Use:

- Feed 1 scoop (10 grams) two times daily per horse with feed or as directed by your veterinarian or equine nutritionist.

G.O. BIG™

Muscle Building, Strength & Recovery

It takes more than Gamma Oryzanol to build and maintain muscularity, strength and recovery.

G.O. BIG™ from Peak Performance Nutrients is the only equine supplement specifically designed to promote long term, lean muscle mass on exercised horses. G.O. BIG is not a high calorie, high fat supplement to simply "Bulk Up" horses or is it a Gamma Oryzanol only product that may provide a temporary muscle "pump" without any truly long term muscle gains. True muscle gains from the ingredients in G.O. BIG will show itself on the track and in the show ring with improved stamina, endurance and recovery.

G.O. BIG provides the highest level of pure, high quality Gamma Oryzanol for quick gains along with the Proprietary G.O. BIG Muscle Building Matrix™ for long term muscular growth, strength and recovery. Don't just feed Gamma Oryzanol, muscle up and perform with G.O. BIG.

Directions for Use:

- Daily Use: Administer 20 grams (1 scoop) once daily with feed or as directed by your veterinarian or equine nutritionist.
- Alternate Directions for Use: Administer 20 grams (1 scoop) twice daily with feed or as directed by your veterinarian or equine nutritionist.

HCX - Hemo Cease Xtreme®

Last Minute, Pre-Event Lung & Capillary Support

In just 4 days, HCX can help lung and capillary function return to normal. HCX - Hemo Cease Xtreme - is a concentrated combination of herbal extracts researched and formulated using ancient Chinese texts. This synergistic combination includes Yunnan Paiyao, Giant Puff Ball, Great Burnett, Indian Madder, Pagoda Tree, Tartarian Aster, Ginseng, and Urn Orchid. Have only a few days before the event? Stop seeing red and get back in the black with last minute pre-event HCX.

HCX is a 4 day pre-event formula and can be used with Hemo Cease Powder which is fed daily.

- Strong enough for the toughest cases
- Fast acting, 4 day supply = 1 event
- No need to use everyday, use it only when needed
- Satisfaction guaranteed

Feed with Daily Use Hemo Cease for a powerful multi-use lung support formula.

Directions for Use:

- Administer 2 level scoops (8 grams) twice per day for three days preceding event and 4 level scoops (16 grams) on day of event.

Hemo Cease®

Concentrated Daily Support for Normal Lung Function

Hemo Cease is a concentrated herbal formula designed to support normal lung function. Hemo Cease is a proprietary blend of capillary supporting bioflavonoids, Rutin, Hesperidin and Quercetin plus the clearing herb Mullein Leaf and antioxidant herb Hawthorne Berry. Feed Hemo Cease daily.

Feed with Last Minute HCX - Hemo Cease Xtreme - for a powerful multi-use lung support formula.

Directions for Use:

- Administer 34 grams (1 scoop) three times per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Joint Renew™

Pure, sugar and filler free Glucosamine Sulfate

As with all joint support formulas, Glucosamine is the primary and possibly the most effective single ingredient. Save money and feed only the hardest working ingredient in any joint support formula, Glucosamine. Joint Renew contains pure glucosamine sulfate without sugar or fillers.

Directions for Use:

- Loading Phase: Administer 10 grams (2 scoops) per horse for 14 days with feed.
- Maintenance: Administer 5 grams (1 scoop) per horse per day with feed.
- For horses weighing over 1,100 lbs, increase serving size in proportion to body weight.

Joint Renew II™

Concentrated Joint Support with Devil's Claw & Glucosamine Sulfate

Joint Renew II™ combines high dose Glucosamine Sulfate and patented Ester-C together with supporting nutrients such as Devil's Claw for comfort without sugar or fillers.

- Extremely concentrated
- Nutrients and herbs essential for joint cartilage support
- Satisfaction guaranteed

"Joint Renew II contains no fillers meaning you can feed smaller amounts for equivalent effects, a real plus for picky eaters." - Horse Journal

Directions for Use:

- Loading Phase: Administer 20 grams (2 scoops) per horse for 14 days with feed.
- Maintenance: Administer 10 grams (1 scoop) per horse per day with feed.
- For horses weighing over 1,100 lbs, increase serving size in proportion to body weight.

Kidnease™

Optimal Kidney Function

All New Kidnease™ from Peak Performance Nutrients is a powerful herbal liquid designed to:

- Flush and clean the kidneys
- Support inflamed kidneys due to water retention
- Provide antioxidant support to the kidneys

Utilizing a proprietary extraction process and high quality herbs, Kidnease provides effective kidney support for performance horses.

Try Kidnease today, your satisfaction is guaranteed.

Directions for Use:

- Daily Use: Orally administer 1 oz. (Approx. 30 mL/1 cap full) per horse per day.

L-Arginine AKG

Supports normal blood-oxygen levels

Known as the "New DMG," L-Arginine AKG supplementation supports the levels of arginine and glutamine in skeletal muscles which can support the immune system compared to animals not receiving L-Arginine AKG. L-Arginine AKG also provides support to help stimulate Nitric Oxide production. As nitric oxide levels increase, vasodilation (the widening of blood vessels) occurs so more nutrients, amino acids, and oxygen can be delivered throughout the body and into the cells. L-Arginine AKG may also be beneficial for horses that founder by providing support for improved blood flow.

L-Arginine AKG can be used as a replacement for or in addition to DMG.

Directions for Use:

- Administer 10 grams (1 scoop) once per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Liver-Zyme®

Purify, Cleanse & Perform

Introducing Liver-Zyme from Peak Performance Nutrients, the most complete and effective liver support product.

All new Liver-Zyme from Peak Performance Nutrients provides ingredients to help cleanse and protect the liver from the stress of competition and environmental factors. Liver-Zyme:

- Should be administered if your horse appears dull or has lost his "spark"
- Supports normal GGT and Bilirubin levels
- Supports normal bile production
- Is formulated to maximize blood flow by supporting Liver, Spleen and Stomach health
- Is a concentrated, palatable liquid herbal product

A fully functioning liver is the basis for a healthy animal which can perform to maximum potential. Give your horse the edge by feeding Liver-Zyme today.

Directions for Use:

- Daily Use: Orally administer 1/2 - 1 oz. (Approx. 15-30 mL) once per day.

Mega Power Pak® Paste

Herbal Pre-Event Power

Support for energy, endurance, breathing and blood oxygen levels.

Powerful pre-event Mega Power Pak® Paste is jam packed with concentrated performance ingredients Creatine Ethyl-Ester, L-Arginine Alpha Keto-Glutarate, DMG and an Herbal Breathing Blend to give your horse the boost needed to finish the event strong. Mega Power Pak Paste will not test and can be used on event day. Try the new Mega Power Pak Paste Today.

Directions for Use:

- Administer 1 tube directly from syringe within 6 hours of exercise.

Omni-Cetyl® H.A.

The Strongest Comprehensive CMO Based Product for Joint Support

Sugar and filler free joint support providing Cetyl Myristoleate (CMO), Glucosamine, HA, MSM, and Chondroitin.

Omni-Cetyl H.A.™ is the most concentrated sugar and filler free joint supplement containing full-dose levels of Glucosamine Sulfate, Hyaluronic Acid, Cetyl Myristoleate, and MSM along with non-bovine source Chondroitin Sulfate and important supporting nutrients. Utilizing the most researched form of Cetyl Myristoleate, the ingredients in Omni-Cetyl H.A. have been shown to support healthy joint function for all horses. Many joint support products only provide a very small, ineffective amount of Cetyl Myristoleate whereas Omni-Cetyl H.A. provides the recommended dose of 4,500 mg. Compare labels and then choose the most concentrated joint support product, Omni-Cetyl H.A.

Omni-Cetyl H.A. concentrated formula will support normal joint function for both heavily worked and trail horses.

Directions for Use:

- Loading Phase: Administer 15 grams (1 scoop) twice per day for 7 days with feed.
- Maintenance: Administer 15 grams (1 scoop) once per day per horse with feed.
- Alternate Use: Administer 15 grams (1 scoop) twice per day per horse with feed.
- For horses weighing over 1,100 lbs, increase serving size in proportion to body weight.

Open Air®

Cold Nights? Congestion? Use Open Air

All New Open Air from Peak Performance Nutrients is a powerful herbal liquid designed to provide support for:

- Bronchodilation
- Energy and endurance
- Respiratory function & health
- Excess mucus buildup

Utilizing a proprietary extraction process and high quality herbs, Open Air provides effective respiratory support for performance horses subjected to cold conditions, dust, pollen and other environmental factors that can hinder air intake and performance. Open Air is effective for both daily and pre-event support.

Try Open Air today, your satisfaction is guaranteed.

Directions for Use:

- Daily Use: Orally administer 1 oz. (Approx. 30 mL/1 cap full) twice per day.

Pain Event Pak™

Powerful Pre-Event for Pain & Discomfort from Training & Exercise

- All natural ingredients to support pain and discomfort associated with training and performance
- Added L-Arginine AKG supports normal blood and nutrient flow to any affected area of the body
- Provides inflammation supporting herbs Tumeric, Boswellia and Ginger

Directions for Use:

- Administer 1 Pak (350 g) per horse the day before the event or as directed by your veterinarian or equine nutritionist.

Peak EFA™

Pure Cod Liver Oil providing essential fatty acids.

Peak EFA is made from pure Cod Liver Oil and is not cut with cheaper oils such as Corn or Soy.

Peak EFA is a high quality fat supplement derived from pure Norwegian Cod Liver Oil and is not cut with cheaper oils such as Corn or Soy. With a natural mint taste, your horses will love it. Cod Liver Oil has approximately 3 times as much digestible energy as oats and 2.5 times as much as corn. This is important when managing a hard keeper or sick horse. Adding fat increases caloric intake without requiring the horse to consume more food. Peak EFA can also have additional benefits such as:

- Inflammation support
- Skin and hoof support
- Behavior support
- Energy utilization support
- Supports absorption of the fat-soluble Vitamins A, D, E, and K

Directions for Use:

- Maintenance: Feed 1 ounce daily per horse with feed.
- Heavy Work: Feed 4 ounces daily per horse with feed.

Perfect Balance Electrolite™

Rehydrate for Optimum Performance

Sugar and Filler Free Electrolyte balanced to match the proportion of electrolytes lost through sweat.

Low cost per serving!

- Concentrated Chloride Levels
- Chelated minerals for improved absorption
- Sugar, filler, Dextrose & Sodium Bicarbonate free
- Perfect for re-hydration before and after strenuous exercise
- Made with only high quality, food grade ingredients
- 2007 Horse Journal Product of the Year

"Perfectly balanced to match sweat losses. Very concentrated formula with no sugars or other fillers." - Horse Journal

Perfect Balance Electrolite is formulated to match the proportion of electrolytes lost in horse's sweat. This ensures accurate balance and absorption for all horses. Perfect Balance Electrolite also provides concentrated Chloride levels which new studies indicate is an extremely important but often overlooked electrolyte. Perfect Balance Electrolite provides rapid re-hydration by including proper levels of Sodium, Potassium, Chloride, Sulfate, Magnesium, Calcium and chelated minerals in a highly concentrated and highly effective formula.

Perfect Balance Electrolite is an excellent choice for performance, trail or IR horses.

Directions for Use:

- Hot Weather/Heavy Work: Feed 2 scoops (22 grams) two times daily per horse with feed.
- Competition: Feed 2 scoops (22 grams) within 1 to 2 hours prior to competition. Immediately following competition, feed one additional serving (2 scoops).
- Cool Weather/Heavy Work: Feed 2 scoops (22 grams) per horse immediately following competition/training session.

Perspirade®

Non-sweater? Try Perspirade today.

New Breakthrough Chinese herbal formula for Anhydrosis

Perspirade is a unique herbal formula designed to support normal production of body fluids (sweat) that help cool the body and restore normal internal balance for horses with anhydrosis (non-sweaters). This proven formula, exclusive to Perspirade, provides support for horses in high temperature, high humidity environments.

Various studies have shown that as many as 25% of exercising horses can be anhidrotic to some degree. Horses that lose the ability to dissipate body heat through sweat can not only lose valuable energy for performance, but can also develop high heart rates and hyperthermia.

Because horses can gradually become anhidrotic, it is important to identify the symptoms as early as possible and implement an effective management program by including Perspirade as part of your daily feeding regimen.

Directions for Use:

- Administration is based on weight of your horse. Administer 1 to 1.5 grams for every 150 lbs of body weight split into two daily doses - one in the a.m. and one in the p.m.

Power Pak® Nitro™

Support for lung, cardiovascular and muscular health during the most intense competitions

Power Pak Nitro is a completely new cutting edge pre-event formula designed specifically for your performance horse in a one dose / one event pak. Power Pak Nitro is supercharged with Creatine Ethyl-Ester and L-Arginine Alpha Keto-Glutarate to encourage Nitric Oxide levels. Nitric Oxide is a key molecule used to transport oxygen and promote muscular blood and nutrient flow. These ingredients combined with a powerful proprietary blend of herbs such as Schisandra, Bulbus Fritillaria, Dong Chong Xia, and Ci Wu Jia help Power Pak Nitro support lung, cardiovascular and muscular health during the most intense competitions.

Directions for Use:

- Pre-Event Use: Administer one Pak three (3) to five (5) hours before event on feed.
- Alternate Use: Administer 1/2 Pak day before event on feed and 1/2 Pak three (3) to five (5) hours before event.

Premium MSM™

Pure, sugar free 99% pure MSM.

Premium MSM from Peak Performance Nutrients uses only the purest MSM. MSM is important in the formation of links between collagen molecules, which provide strength to tendons, ligaments and joint tissues. Premium MSM from Peak Performance Nutrients provides 10,000 mg of 99% pure MSM per serving.

Directions for Use:

- Administer 10 grams (1 scoop) once per horse per day with feed.

Pro RBC™

Iron is Toxic. Evolve with Pro RBC™

Comprehensive Iron-Free Herbal Formula for Red Blood Cell Support.

Pro RBC™ is a comprehensive herbal combination designed to promote Red Blood Cell production in the bone marrow. Additionally, Pro RBC promotes a healthy spleen which is responsible for removing damaged red blood cells from circulation. The spleen stores between 30%-50% of Red Blood Cells which it releases during times of stress and activities such as racing or showing. This release is unique to the horse and gives it the ability to race and compete. Pro RBC does not contain iron like many other blood builders. Iron deficiency is very rare in a horse on a normal feed program and iron toxicity is more dangerous and prevalent than iron deficiency.

See results with Pro RBC in as little as 7 days.

Directions for Use:

- Daily Use: Orally administer 1 oz. (Approx. 30 mL/1 cap full) twice per day.

Pro V.M.®

For the Specific Demands of Race Horses

Concentrated professional multi-use vitamin, mineral & amino acid formula for race horses.

Pro V.M.'s all-inclusive formula provides ingredients for:

- Joint and connective tissue support
- Immune system support
- Attitude management
- Endurance
- Performance
- Muscle support
- Electrolytes
- Hoof support

Race horses have increased nutritional needs that cannot always be addressed by feed alone. Constant high intensity exercise places extreme demands on the horse's joints, immune system and muscular system. Without the ingredients in Pro V.M.®, your horse could become deficient in various vitamins and minerals which could lead to reduced performance, health and attitude. Pro V.M. is specifically formulated for race horses by including the highest dietary recommended amount of each nutrient; nutrients that are depleted by intense exercise. Pro V.M. also provides nutrients to support common problems in race horses such as tying up, electrolyte imbalance that may be caused by Lasix®, thumps, joint issues and fragile lung capillaries that can burst under the extremes of racing.

If your horse isn't performing up to his full potential, try Pro V.M. for 30 days and see what a concentrated, specifically formulated product can do for your race horse.

"For...performance horses, we'd go with Pro V.M.'s concentrations and ingredients." - Horse Journal

Directions for Use:

- Administer 1 scoop (Approx 50 grams) once per horse per day or as directed by your veterinarian or equine nutritionist.

Pro V.M.® w/ EFA's

For the Specific Demands of Show Horses

Pro V.M. with EFAs is a comprehensive sugar free multi-use vitamin, mineral, amino acid & probiotic formula for show horses.

The ingredients in Pro V.M. w/ EFA's provide:

- Behavior support
- Muscle recovery support
- Joint support
- Electrolyte balance
- Digestive support
- Antioxidant support
- Skin and coat support
- Hoof support
- Performance support

Pro V.M. with EFAs (Essential Fatty Acids) is an exceptional, comprehensive formula designed with relentless attention to the details important to a premium supplement: quality ingredients, absorption, balance, and concentration. Pro V.M. with EFAs provides a concentrated, balanced formula made with high quality food grade ingredients. This formula utilizes the most absorbable forms of nutrients such as chelated minerals and Selenium in the form of Selenomethionine. Pro V.M. with EFAs adds high quality full fat flax meal to provide quality Omega 3 and 6 Fatty Acids for improved coat and skin support. This formula also provides MSM and Glucosamine Sulfate for joint tissue support. Chromium Picolinate is included to help maintain a more even blood sugar level and probiotics for digestive system support. Pro V.M. with EFAs also provides phosphorus as Mono Sodium Phosphate, the preferred low iron form of phosphorus for IR horses.

Directions for Use:

- Administer 1 scoop (Approx 35 grams) twice per horse per day with feed or as directed by your veterinarian or equine nutritionist.

Tie Free® 24™

Support for Horses that Tie Up

"For added control with horses prone to tying up, we would reach first for Tie Free 24, which covers the major nutritional bases." "The ingredients in Tie Free read like a who's who in muscle nutrients. Response to this product was excellent, including in two horses that did not respond to other products." - Horse Journal.

The only guaranteed proprietary formula for tying up that helps even the toughest cases. Perfect for detention and non-detention situations alike. There's no need to feed Tie Free® 24 on event day.

- All natural formula to support muscles that cramp when too much lactic acid builds up or electrolyte imbalance is present
- Beneficial for horses on Lasix
- Highly rated by the Horse Journal
- Beneficial for any horse that is heavily worked
- Satisfaction guaranteed

Tie Free 24 is a daily use product with a recommended dose of just 10 grams per day and 60 grams the day before an event. There's no need to use Tie Free 24 on event day.

Tie Free 24 is the only guaranteed proprietary formula to provide support for horses that tie up and can help even the toughest cases. Perfect for detention and non-detention situations alike.

CAUTION: FOR DISCIPLINES THAT TEST FOR SODIUM BICARBONATE, DO NOT USE TIE FREE 24 ON THE DAY OF THE EVENT. USE AS DIRECTED. PEAK PERFORMANCE NUTRIENTS WILL NOT BE HELD LIABLE FOR ANY POSITIVE TESTS AS A RESULT OF THE MISUSE OF THIS PRODUCT.

Directions for Use:

- Administer 1 small scoop (provided) every day and administer 1 large scoop (provided) the day before heavy training/performance. Keep your horse well hydrated.

Tie Free® TMC™

Total muscle care for performance horses

Sodium Bicarbonate Free

- Supports replenishment of glycogen stores
- Supports muscle recovery
- Supports muscles prone to tying up
- May help horse maintain his top speed longer

Tie Free TMC contains nutrients important to heart and skeletal muscle function including Amino Acids, and Calcium. Additionally, Tie Free TMC provides a special protein matrix which includes important cofactors Beta-Lactoglobulin, Alpha-Lactalbumin, and Glycomacropeptide. This special protein matrix, exclusive to Tie Free TMC, supports replenishment of glycogen stores during intense activity. Glycogen provides energy to the muscles and accelerates recovery after intense exercise. Also, the components of the Tie Free TMC protein matrix support the muscles in synthesizing amino acids needed for muscle recovery and growth.

Directions for Use:

- Feed 1 scoop (Approx. 14 grams) twice daily with feed or as directed by your veterinarian or equine nutritionist.

Tie Up Event Pak™

Concentrated, Bicarbonate Free Pre-Event to Support Tying Up

- Support for proper electrolyte balance and excessive lactic acid buildup for a strong finish
- Sodium Bicarbonate Free
- Provides a high dose of muscle supporting nutrients Potassium, Magnesium, Thiamine & Riboflavin

Directions for Use:

- Administer 1 Pak (350 g) per horse the day before the event or as directed by your veterinarian or equine nutritionist.

Ulsus™

Triple action formula for digestive health

Up to 92% of all performance horses may show signs of stomach erosions. In addition to stomach erosions caused by exercise, erosions may form in horses that: 1) Do not have a constant access to pasture, 2) Have a lowered hay intake, 3) Have become stall bound, and 4) Are fed processed feeds instead of whole grains.

Ulsus may provide support for your horse's digestive system in three ways: First, by providing ingredients that have been shown to balance acidity in the stomach by neutralizing a portion of the acid buildup, second, by providing ingredients that support a protective mucus layer on the stomach lining thus protecting it from the remaining acid and third, by providing ingredients that the body can use to support a healthy digestive lining in an overly acidic environment.

Directions for Use:

- Administer 23 grams (1 scoop) twice per horse per day with feed.

Vitamin E, Selenium & Zinc™

High Level Vitamin E and Antioxidant Formula

Sugar Free Vitamin E, Selenium and Zinc is a comprehensive antioxidant support formula for all horses exposed to allergens, pollutants and selenium deficient soil. Absorption is the key issue in vitamin and mineral supplements which is why this formula provides absorbable forms of these nutrients. Sugar Free Vitamin E, Selenium and Zinc provides buffered Vitamin C in the form of Ester-C which will not cause gastrointestinal upset, Selenium in the form of Selenomethionine which is the form found in hay, Zinc and Copper Amino Acid Chelate which are chemically bound with an amino acid for better absorption into the cell plus 2,500 IU of Vitamin E. All this in one 10 gram serving provides your horse with the most concentrated and absorbable antioxidant supplements for cellular and muscular health available.

Directions for Use:

- Administer 10 grams (1 scoop) once per day with feed or as directed by your veterinarian or equine nutritionist.
