Vitamin-Mineral Supplement for Lactating Mares

Uckele EQUINE

For use in Equine only.
Vitamin, mineral and digestive aid for horses.

Feeding Directions:
Feed at the rate of 1-2 lbs. daily to gestating mares 30 to 60 days prior to foaling. Continue feeding Milk & Grow for at least the first 90 days of lactation. Feed foals at the rate of 0.25 to 1 lb. daily.
1 scoop = 8 oz. (included)

No claims are expressed or implied. Consult your veterinarian as to advisability of the use for this product.
For animal use only.

*Micro-Cool™ Process: Each micro particle is coated with specialty processed edible oils containing essential fatty acids and mixed tocopherols. Micro-Cool coproduction process results in dust inhibition.

DISCLAIMER: The directions for the use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risk inherently associated with the use of this product. In no case shall Uckele Health & Nutrition, Inc. or the seller be liable for consequential, special or indirect damages resulting from the use or handling of this product.

WARRANTY: Uckele guarantees label potency up to three months from date of manufacture or through expiration date if shown. If product fails to meet guaranteed analysis during this period, your purchase price of the unused product will be refunded.
